

INTEGRATED FIBER OPTIC NETWORK SOLUTION

As the only Company offering products for every needs to develop Fiber Optic Network , Spiktel is positioned strongly in high growth geographies and high growth industries like Telecom , Power & Infrastructure with their bucket of Fiber Optics .

FO CABLES

Spiktel's products portfolio for cables caters to introduced unique cabling products for residential installations, installation under water, utilities and for high-security defense purposes. Spiktel has high capacity plant to draw all possible designs for Optical fiber cables and data cables .

FO ACTIVE

Company originates from Electronics industry, the basics of physics and science to the telecommunication industry bring us to this level . With the introduction of VSAT products to Fiber Optical , we have now complete range of Multiplexers , FO converters, SFP/ XFP Modules . Spiktel also developed a range of industrial grade solutions which sustain the industrial harshest environments to our products

GPON and GEAPON , the FTTX developing network solutions are the key requirements of telecom for their last mile drop . Spiktel R&D with voice, video, data and integrate value added services to the platform and successfully launched their set of solutions to this industry.

INTEGRATED FIBER OPTIC NETWORK SOLUTION

FO PASSIVE

Passive optical components significantly reduce costs in the network by eliminating the need to power and service active components. They also expand the capacity of the existing fiber network. SPIKTEL's components include RFoG WDM, CDWM, DWDM, optical splitters and optical couplers. SPIKTEL is a leader in manufacturing of terminated optical product, and more importantly, our team of engineers and technicians provide you with real-world, hands-on experience to build products that answer the challenges of your business and your network.

FO T&M

Spiktel further established a joint venture with ERICCSHEN – GERMANY (globally diversified resources group) in July 2009 for the manufacture of optical fiber testing and measuring equipments for enterprise and operator . Apart of this Spiktel has launched work specific tool kits required by engineers / installers for their cables and passives at the project.
